Important:

Please read these instructions carefully prior to installation.

Please refer to your fitting instruction to ensure that the bike rack is installed in the correct locations. Check the contents of kit before commencing fitment and report any discrepancies.

Place these instructions in the vehicle's glove box after installation is complete.

### **Important Information**

Maximum carrying capacity: 75kg (165lbs) ie. 4 x Kayaks at no more than 19kg (42lbs) each.

Please refer to your vehicle manufacturers handbook for maximum carrying capacity of your roof racks. Always use the lower of the two figures. Load must be evenly distributed over the crossbars.

Warning: Do not attempt to fit the Stack to your vehicle unless you fully understand this fitting instructions. Please direct any questions regarding fitting to the dealer from where the Stack was purchased. Use only non-stretch fastening ropes or straps.

#### Recommendations:

It is essential that all bolt connections be checked after driving a short distance when you first install your roof racks and Stack. Bolt connections should be checked again at regular intervals (once a week is enough, depending on road conditions, usage, loads and distances travelled). You should also check the roof racks and Stack each time they are re-fitted. Always make sure to fasten your load securely. Please also ensure that all loads are evenly distributed and that the centre of gravity is kept as low as possible. Long loads must be secured front and rear with non-stretch fastening ropes or straps.

#### Roof racks must be removed when putting vehicle through an automatic car wash.

Caution: The handling characteristics of the vehicle changes when you transport a load on the roof. For safety reasons we recommend you exercise extreme care when transporting wind-resistant loads. Special consideration must be taken into account when cornering and braking.

#### **Note for Dealers and Fitters**

It is your responsibility to ensure this fitting instruction is given to the end user or client

Rhino-Rack

3 Pike Street, Rydalmere,

NSW 2116, Australia. (Ph) (02) 9638 4744

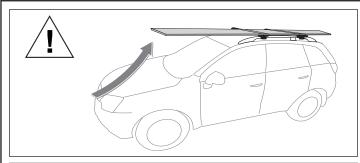

(Fax) (02) 9638 4822 Authorised By: Chris Murty

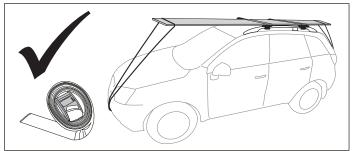

Document No: R483 Fit Time: 20min Prepared By: Kayle Everett Issue No: 02

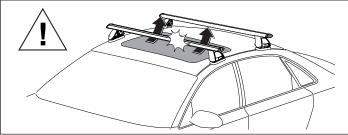

Issue Date: 10/02/2016

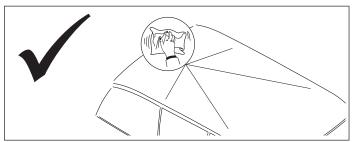

These instructions remain the property of Rhino-Rack Australia Pty Ltd and may not be used or changed for any other purpose than intended.

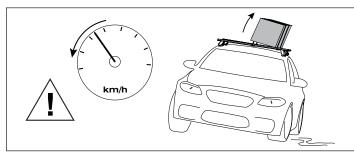

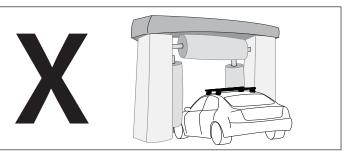

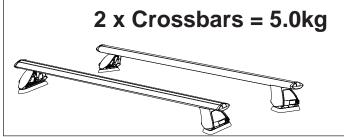

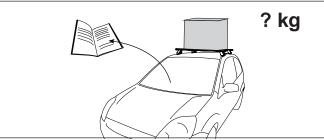

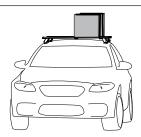

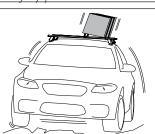

When these roof racks are to be used on a vehicle that is driven off sealed roads, the manufacturer maximum roof load rating (to be found in the vehicles User Manual) should be *halved*. Do not forget to subtract 7.5kg from your maximum carrying capacity due to the weight of the crossbars and legs.

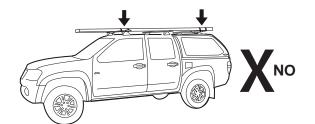

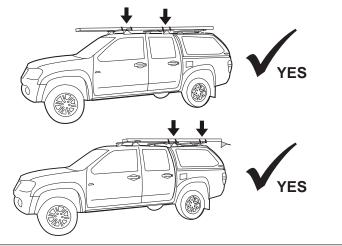

60kg load rating (Urban road) — 30kg load rating (Off road - 60kg / 2)

### **WARNING!** Important Load Carrying Instructions

With utility vehicles, the cabin and the canopy move independently. Roofracks and vehicle can be damaged if the item transported is rigidly fixed at points on both the cabin and canopy. Instead, rigidly fix to either the cabin roofracks or the canopy roofracks.

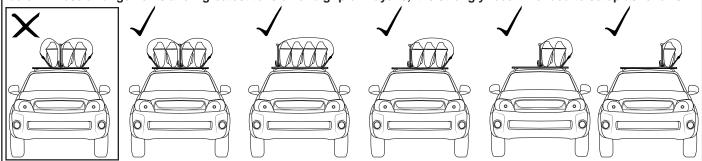

### **Parts List**

Item	Component Name	Qty	Part No.
1a	M6 x 16mm Coach Screws	8	-
1b	M6 x 50mm Coach Screws	8	-
2	Top Moulding	2	M743
3	Pivot Moulding	2	M741
4	KR Cam	2	M637
5	Kayak Stack Base	2	M741
6	Kayak Stack Clamp	2	CA1351
7	M6 x 12mm Button Security Screw	4	B148
8	M6 x 16mm Flat Washer	12	W003
9	M6 Nyloc Nut	8	N069
10	M6 Nut Plate	4	N025
11	5mm Allen Key	1	H002
12	Plastic Knob	8	-
13	M6 Spring Washer	4	W004
14	5.5m Straps	2	-
15	4.5m Straps	2	-
16	Instruction	1	R483

Tools: Knife - Tape Measure - Allen Key (provided)

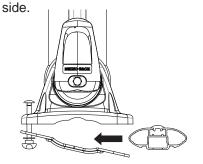

#### Instructions

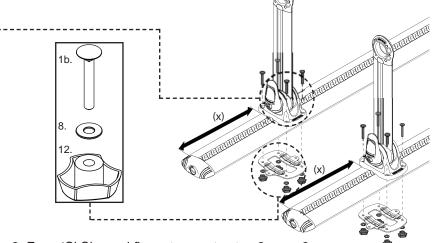

Correct Kayak arrangements. Additional straps may be required for more than two Kayaks. Optimal safety setups shown below. These arrangements allow greatest tension and grip on kayaks, it is strongly recommended to setup as follows:

Over Bar Fit: Fix the Stack over the Crossbars with Stack Clamp on the underside of the bar. Use items 1b,8 and 12 to fix the unit in place. Measure the distance of the Stack back from the Crossbar End Cap (x). Position the second Stack at this measurement on the other Crossbar. Install the second Stack as above.

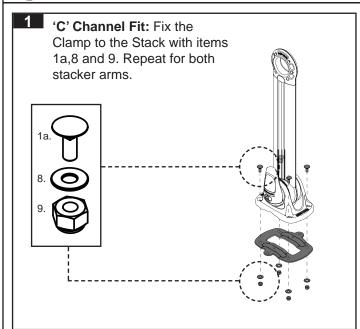

Note: For easy install, attach one side on the Stack Clamp loosely. Slide the Assembly over the Crossbar and tighten the opposite

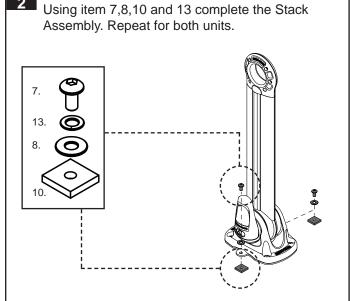

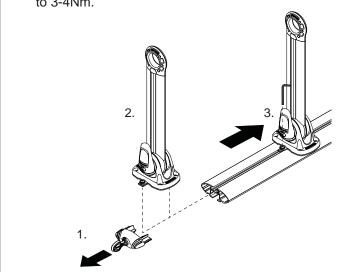

Note: Once complete, move to step 6 page 3. For a 'C' Channel fitment move to step 2 page 3.

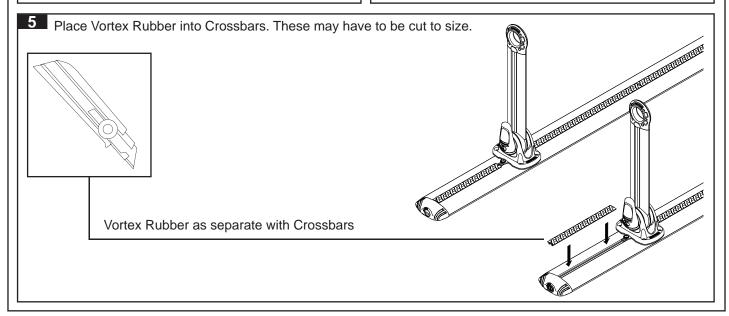

1: Remove bar end caps. 2: Slide the first assembly into the C-Channel of the front Crossbar. 3: Tighten with the Allen Key provided to 3-4Nm.

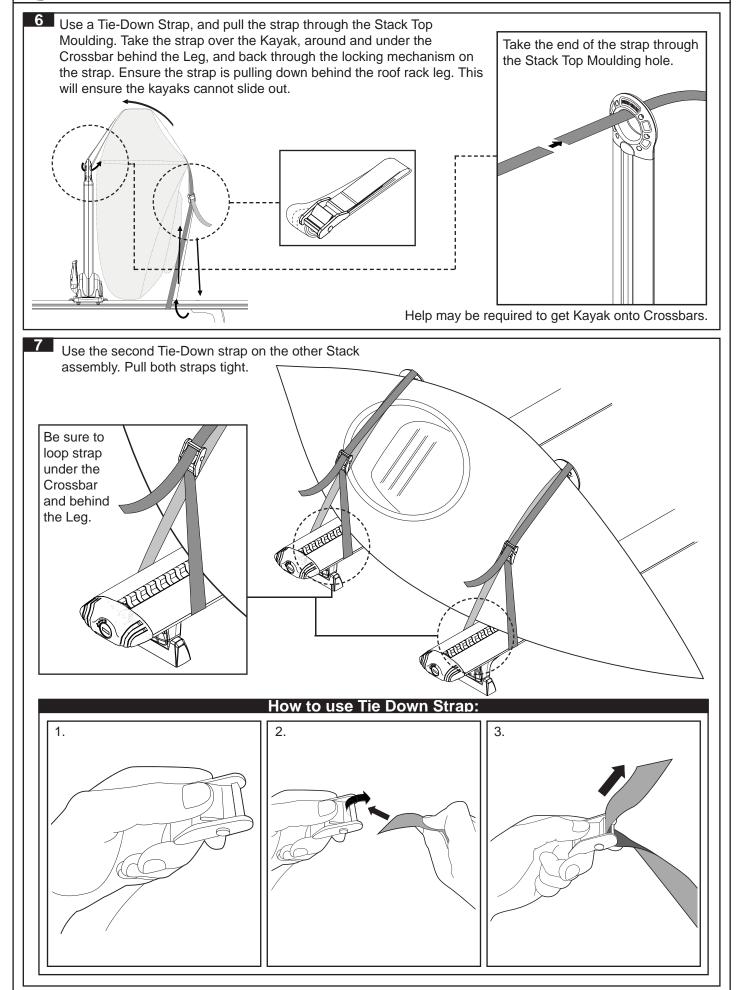

Slide the second Assembly into the C-Channel of the rear crossbar. Make sure Assemblies are level by measuring distance (x) for the front Crossbar and repeating this distance for the rear. Tighten with the Allen Key provided to 3-4Nm. Replace bar End Caps.

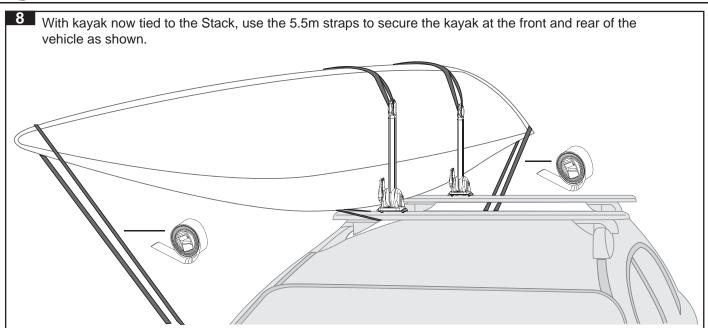

End Caps as separate with Crossbars

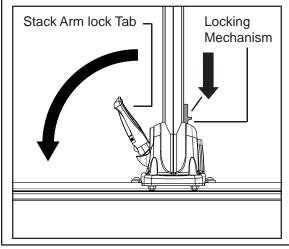

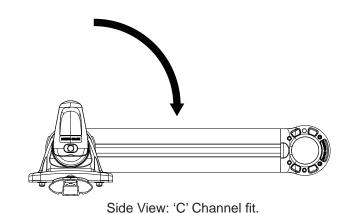

When not in use the Kayak Stack can be lowered towards the roof. 1: Open the Stack Arm lock Tab. 2: Depress the red Locking Mechanism and drop the arm toward the roof. Release the Locking Mechanism and return the Arm lock Tab to its original position.

If the Cam Lever feels loose it can be tightened by using a 10mm socket wrench. By holding the Stack Arm Lock Tab and tightening the M6 Nyloc Nut. Always check the Plastic Knob or M6 hardware is secure before using the Stack.
